

Infrastructure investments as a tool for implementing the strategy of sustainable development of regional economic systems

Kazan Federal University, 420008, Kremlevskaya 18, Kazan, Russia

Abstract

© 2018, Springer International Publishing AG. The purpose of this article is to study the potential of the reference sectors, creating the fundamental basis for the implementation of the strategy of sustainable development of regional economic systems and attracting investment. The authors' position is based on the capacity assessment of the regional transport infrastructure, ensuring the implementation of its strategy for sustainable development. The study presents a model of transport infrastructure capacity assessment in the region – Republic of Tatarstan (Russia) for the formation on its territory of the transport cluster (Eurasian hub), planned within the framework of the Strategy for socio - economic development of the Republic until 2030.
